Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of the appeal brief filed on 02/17/06 PROSECUTION IS HEREBY REOPENED. Claims 1, 5, 9, 13, 17 and 21 are rejected under the new ground of set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5, 9, 13, 17 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Robertson [US. 6,609,106].

As to claim 1, Robertson teaches a computer implemented method and corresponding apparatus for using in a graphical user interface configured to support a login operation comprising the steps/means for:

displaying at least one user identifier prompt within a graphical user interface, the at least one user identifier prompt including at least one selectable user area (figure 20A) operatively associated with a previously configured user capable of completing a login operation by inputting user password input (figure 18, column 20, lines 26-36);

upon receiving user input selecting the at least one selectable user area, displaying at least one user input field within the graphical user interface wherein the at least one user input field is automatically configured to operatively receive user password input associated with the login operation (figure 20 A);

while conditions allow for the reception of the user password input and it is determined that there has been a failure to operatively receive the user password input for the login operation, then automatically displaying reminder information associated with the user input field through a non-modal mechanism within the graphical user interface (figure 20C, column 20, lines 40-53).

As to claim 5, Robertson also teaches the reminder information including user provided password reminder information (figure 18, column 13, lines 51-65).

As to claims 9 and 17, they are similar in scope to claim 1; therefore, they should be rejected under similar rationale.

As to claims 13 and 21, they are similar in scope to claim 5; therefore, they should be rejected under similar rationale.

Response to Arguments

Applicant's arguments with respect to claims 1, 5, 9, 13, 17 and 21 have been considered but are moot in view of the new ground(s) of rejection.
